Counseling

We regularly organise counseling sessions where professors and their teams from the University of Jammu interact with the students and their parents. Additionally, periodic field visits to the students' homes are also conducted. Special emphasis is laid on the parents so that they can also understand the importance of education, benefits of keeping their children in school and the crucial role they play in ensuring this.

Over 15 years. 63 lakh rupees. 2773 scholarships.

Ignored by society and victims of circumstances, the children we help are unable to fulfill even their basic needs. This includes a large number of girls. Through scholarships and grants, we are able to support their education, counseling and medical expenses along with other needs. This includes materials like laptops, books, games, clothes, etc. Our scholarships are primarily given on a need plus merit basis. However, we also have a certain percentage allocated especially towards orphans and children with disabilities. We hope to give these students a fair shot at a future they could have never dreamt of, alone.

The Girl Child

Unfortunately, India is a country where even in this day and age, the girl child struggles to survive even before she is born. Which is precisely why we strongly discourage child marriage and ensure that 82% of all our sponsored beneficiary children are girls. At HBET, we strongly believe that if you educate a girl, you educate generations to come.

Medicare

We regularly organise free medical camps for all of our children and their parents. In collaboration with the Bee Enn General Hospital, these camps include physical check ups, as well as dental and eye examinations. Any and all medication and treatment prescribed is also free of cost.
